Storm Data and Unusual Weather Phenomena - November 2006

| <u>Location</u> | <u>Date/Time</u> | <u>Deaths &</u> <u>Injuries</u> | Property & Crop Dmg | Event Type and Details |
|-----------------|--------------------|--|------------------------|-------------------------|
| | 11/30/06 23:10 CST | 0 | 5K | Strong Wind (MAX 39 kt) |
| | 11/30/06 23:10 CST | 0 | 0 | |

A strong cold front pushed into Arkansas from the northwest on the 29th and eventually worked into Southeast Arkansas by the afternoon of the 30th. Heavy rain developed to the north of the front, while a few strong thunderstorms occurred over the southeast part of the state. Gusty northwest winds followed the front, and caused spotty damage.
